

You can come across a wide range of butterflies and bees whilst walking, especially when it's warm. Butterflies have long 'tongues' that can pick up sweet nectar from long-tubed flowers, as well as other flower-shapes. Bees are often seen feeding in bell-shaped flowers or 'open' flowers.

Look out for butterflies and bees on your way to or from school.

Where are they coming from or going to?

Which types or shapes of flowers are being visited most?

Which coloured flowers are being visited most?

Talk about what you see with your walking partners.
